

EXP 1:Installation and Configuration of Flutter Environment.

AIM: Installation and Configuration of Flutter Environment.

STEPS FOR INSTALLATION:

Step 1: Download the installation bundle of the Flutter Software Development Kit for windows. To download Flutter SDK, Go to its official website, you will get the following screen.

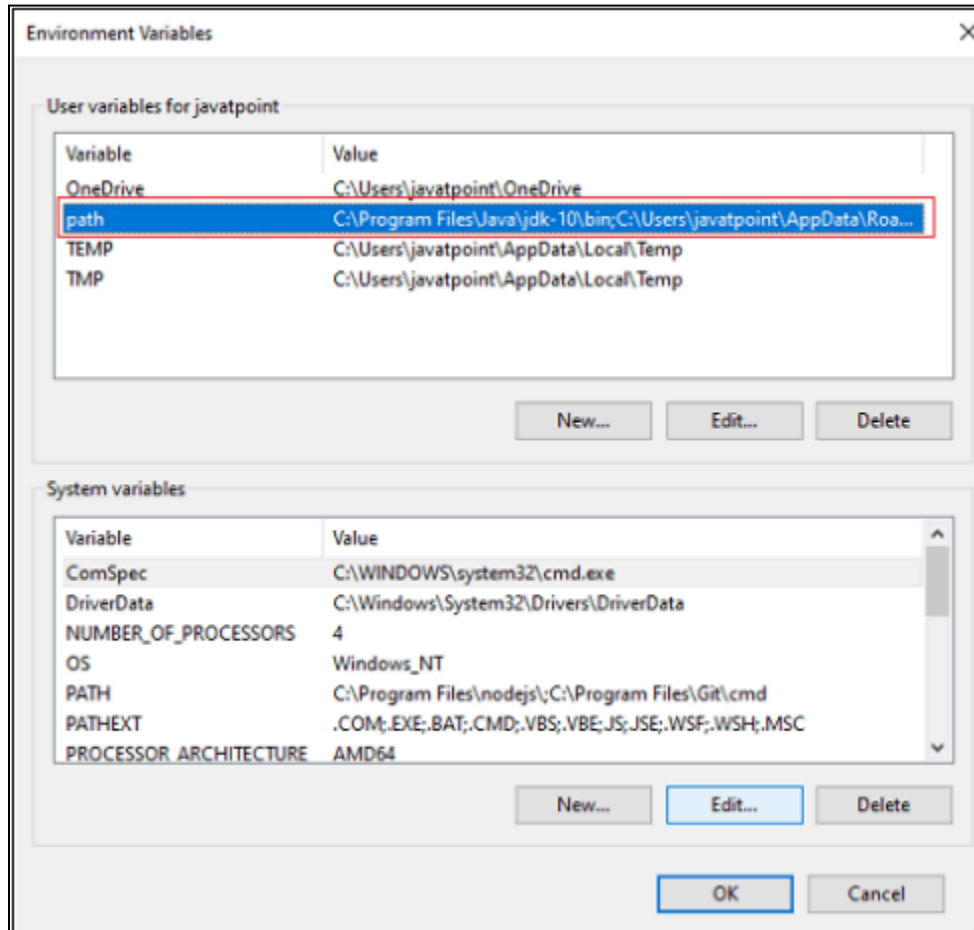

Step 2: Next, to download the latest Flutter SDK, click on the Windows icon. Here, you will find the download link for SDK.

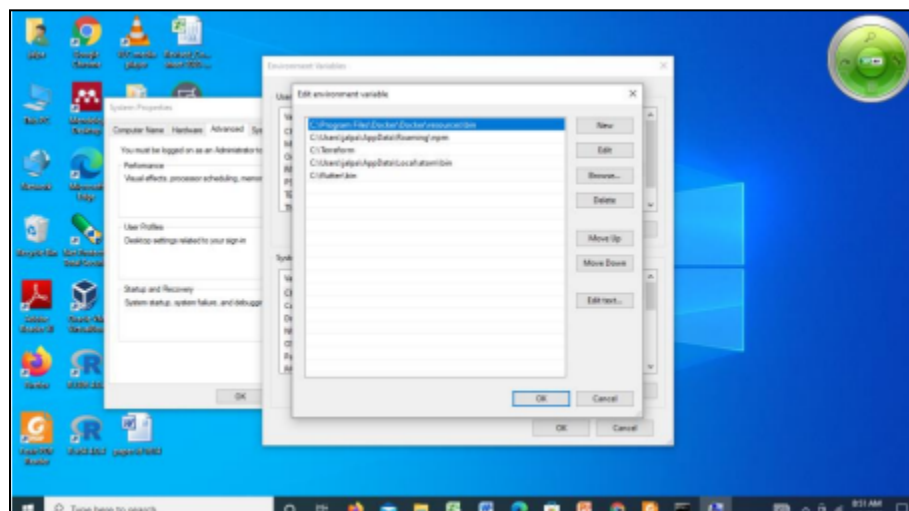

Step 3: When your download is complete, extract the zip file and place it in the desired installation folder or location, for example, C: /Flutter.

Step 4: To run the Flutter command in regular windows console, you need to update the system path to include the flutter bin directory. The following steps are required to do this:

Step 4.1: Go to MyComputer properties -> advanced tab -> environment variables. You will get the following screen.

Step 4.2: Now, select path -> click on edit. The following screen appears

Step 4.3: In the above window, click on New->write path of Flutter bin folder in variable value -> ok -> ok -> ok.

Step 5: Now, run the \$ flutter -version command in the command prompt.

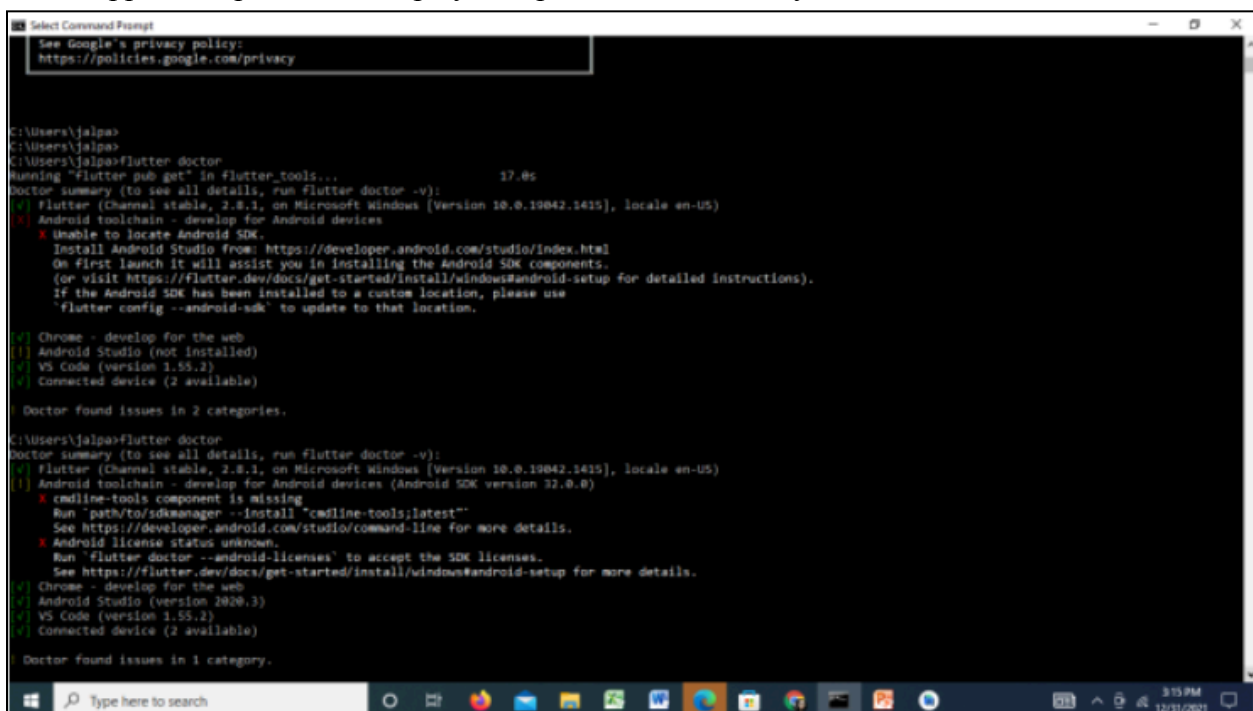

```
C:\Users\acer>flutter --version

A new version of Flutter is available!

To update to the latest version, run "flutter upgrade".

Flutter 3.16.7 • channel stable • https://github.com/flutter/flutter.git
Framework • revision e1af02aea (8 days ago) • 2024-01-11 15:19:26 -0600
Engine • revision 4a585b7929
Tools • Dart 3.2.4 • DevTools 2.28.5
```

Now, run the \$ flutter doctor command. This command checks for all the requirements of Flutter app development and displays a report of the status of your Flutter installation.

```
Select Command Prompt

C:\Users\jalpa>
C:\Users\jalpa>
C:\Users\jalpa>flutter doctor
Running "Flutter pub get" in flutter_tools... 17.0s
Doctor summary (to see all details, run flutter doctor -v):
[✓] Flutter (Channel stable, 2.8.1, on Microsoft Windows [Version 10.0.19042.1415], locale en-US)
[✓] Android toolchain - develop for Android devices
[✗] Unable to locate Android SDK.
     Install Android Studio from: https://developer.android.com/studio/index.html
     On first launch it will assist you in installing the Android SDK components.
     (or visit https://flutter.dev/docs/get-started/install/windows#android-setup for detailed instructions).
     If the Android SDK has been installed to a custom location, please use
     'flutter config --android-sdk' to update to that location.
[✓] Chrome - develop for the web
[!] Android Studio (not installed)
[✓] VS Code (version 1.55.2)
[✓] Connected device (2 available)

```

Step 6: When you run the above command, it will analyze the system and show its report, as shown in the below image. Here, you will find the details of all missing tools, which required to run Flutter as well as the development tools that are available but not connected with the device.

Step 7: Install the Android SDK. If the flutter doctor command does not find the Android SDK tool in your system, then you need first to install the Android Studio IDE. To install Android Studio IDE, do the following steps.

Step 7.1: Download the latest Android Studio executable or zip file from the official site.

Step 7.2: When the download is complete, open the .exe file and run it. You will get the following dialog box.

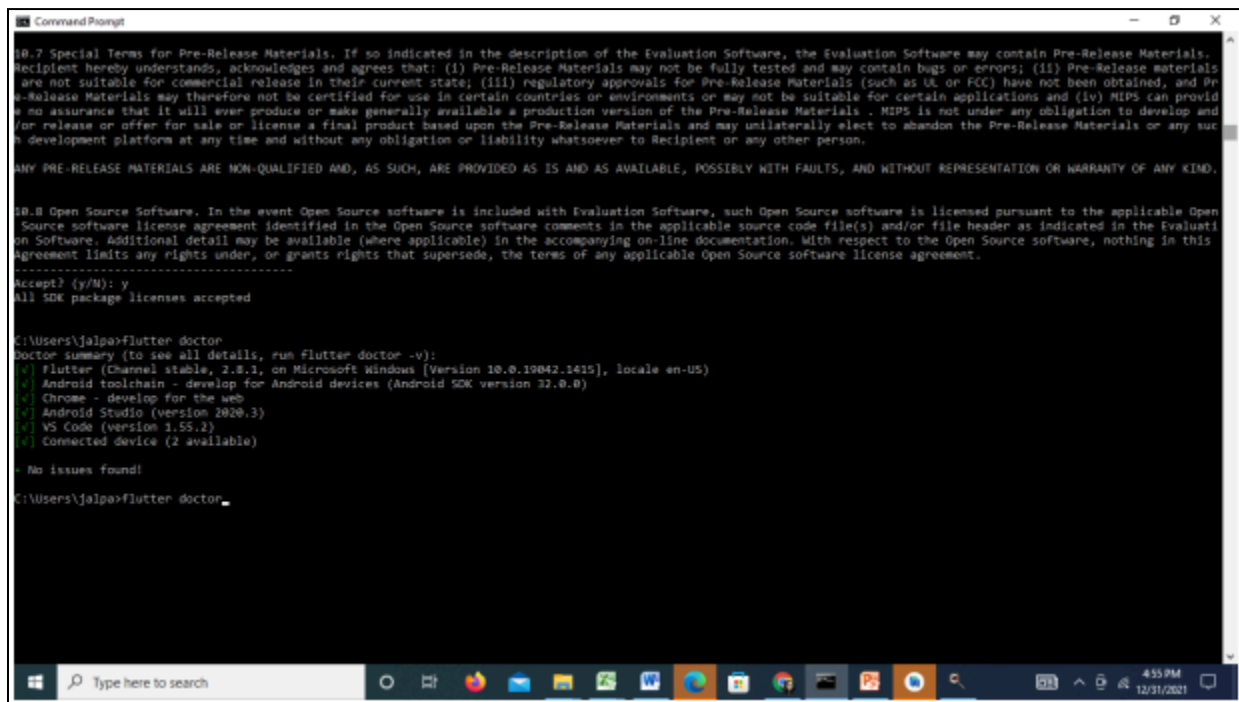

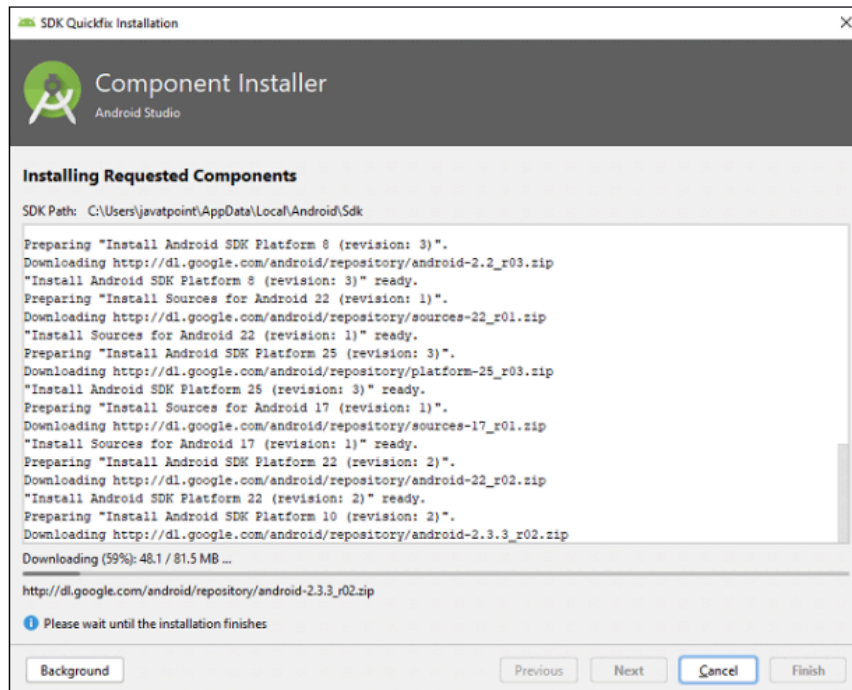

Step 7.3: Follow the steps of the installation wizard. Once the installation wizard completes, you will get the following screen.

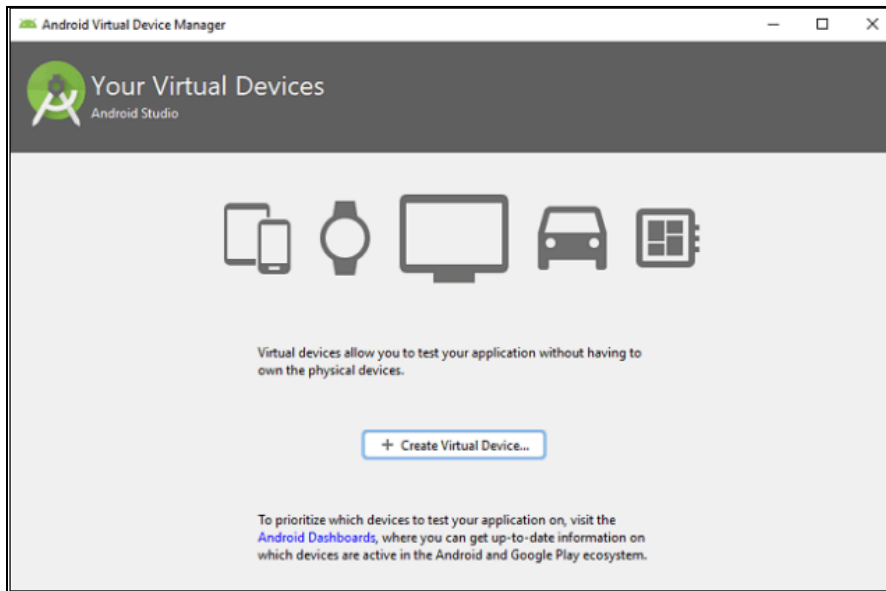

Step 7.4: In the above screen, click Next-> Finish. Once the Finish button is clicked, you need to choose the 'Don't import Settings option' and click OK. It will start the Android Studio.

Step 7.5 run the \$ flutter doctor command and Run flutter doctor --android-licenses command.

Step 8: Next, you need to set up an Android emulator. It is responsible for running and testing the Flutter application.

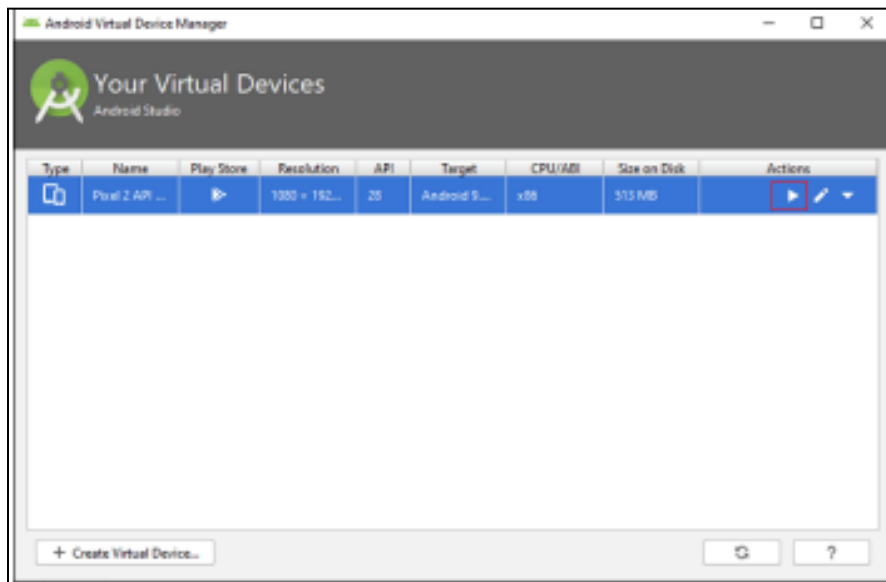

Step 8.1: To set an Android emulator, go to Android Studio > Tools > Android > AVD Manager and select Create Virtual Device. Or, go to Help->Find Action->Type Emulator in the search box. You will get the following screen.

Step 8.2: Choose your device definition and click on Next.

Step 8.3: Select the system image for the latest Android version and click on Next.

Step 8.4: Now, verify the all AVD configuration. If it is correct, click on Finish. The following screen appears.

Step 8.5: Last, click on the icon pointed into the red color rectangle. The Android emulator displayed as below screen.

Step 9: Now, install Flutter and Dart plugin for building Flutter applications in Android Studio. These plugins provide a template to create a Flutter application, give an option to run and debug Flutter application in the Android Studio itself. Do the following steps to install these plugins.

Step 9.1: Open the Android Studio and then go to File->Settings->Plugins.

Step 9.2: Now, search the Flutter plugin. If found, select Flutter plugin and click install. When you click on install, it will ask you to install Dart plugin as below screen. Click yes to proceed.

Step 9.3: Restart the Android Studio.

STEPS FOR CREATING AN APP:

Step 1 : Create the app

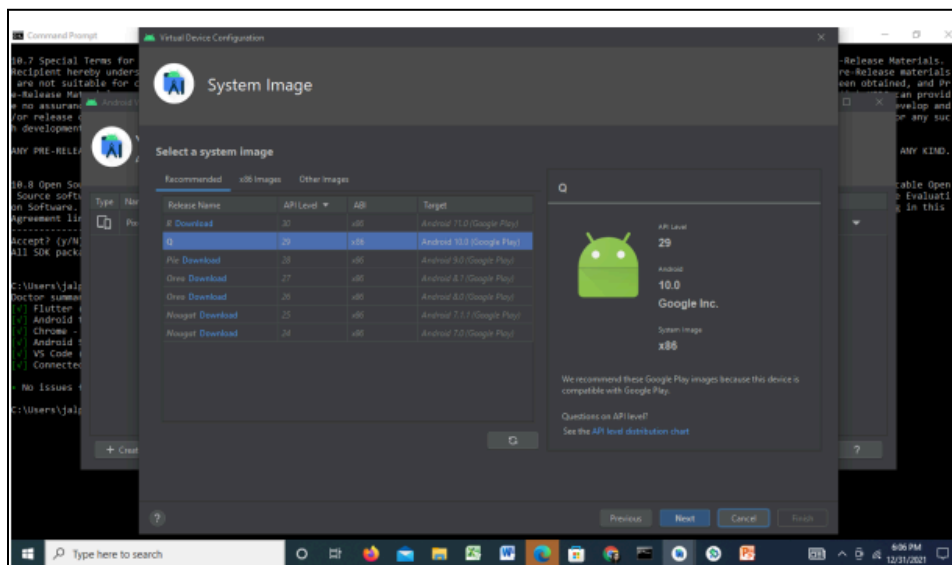

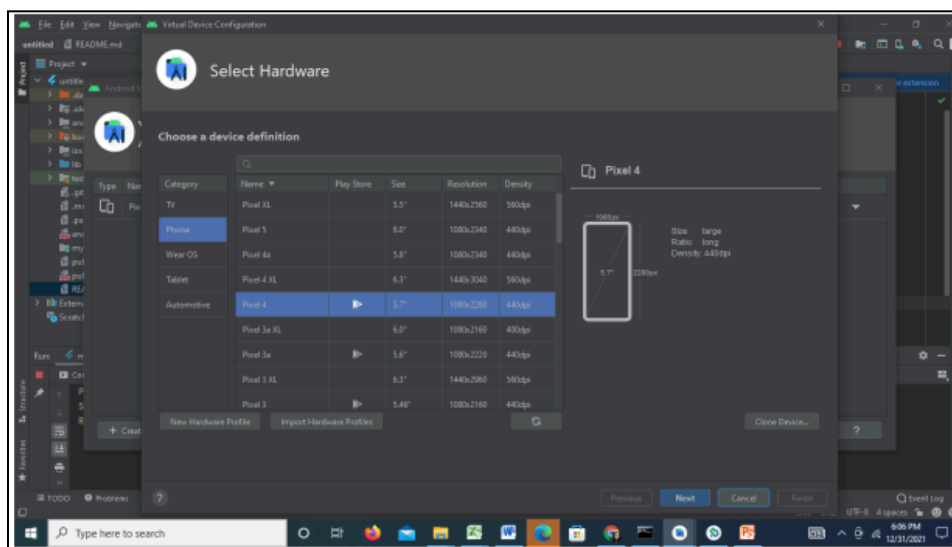

1. Open the IDE and select Create New Flutter Project.
2. Select Flutter Application as the project type. Then click Next.
3. Verify the Flutter SDK path specifies the SDK's location (select Install SDK... if the text field is blank).
4. Enter a project name (for example, myapp). Then click Next.
5. Click Finish.
6. Wait for Android Studio to install the SDK and create the project.

Step 2: Run the app

1. Locate the main Android Studio toolbar:

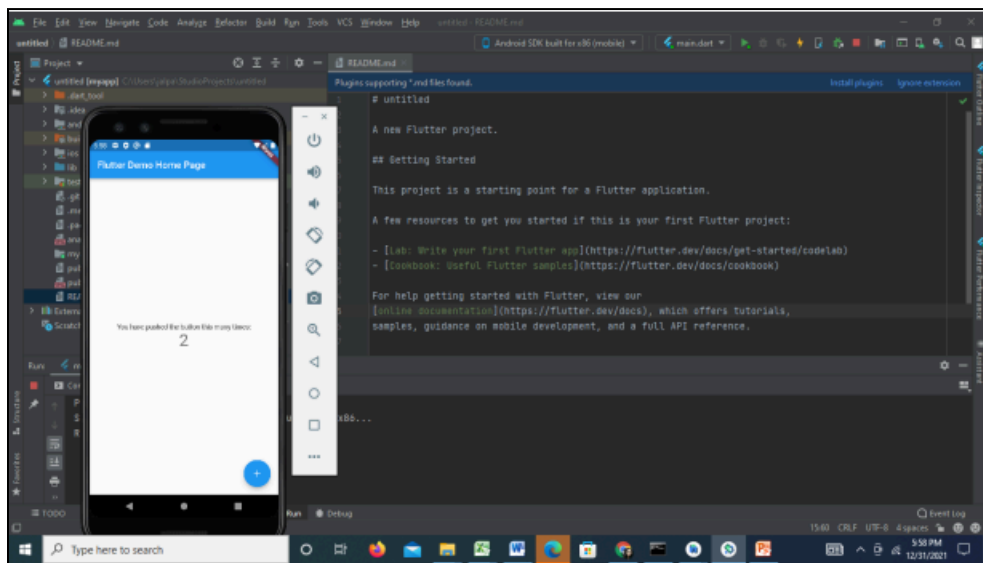

2. In the target selector, select an Android device for running the app. If none are listed as available, select Tools > AVD Manager and create one there.

3. Click the run icon in the toolbar, or invoke the menu item Run > Run.

Step 3 : Creating app

1. Replace the contents of lib/main.dart. - Delete all of the code from lib/main.dart.
2. Replace with the following code, which displays “Susmita Santi” in the center of the screen.

CODE:**//main.dart**

```
import 'package:flutter/material.dart';
void main() {
  runApp(const MyApp());
}
class MyApp extends StatelessWidget {
  const MyApp({Key? key}) : super(key: key);
  @override
  Widget build(BuildContext context) {
    return MaterialApp(
      title: 'Welcome to Flutter',
      home: Scaffold(
        appBar: AppBar(
          title: const Text('Welcome to Flutter'),
        ),
        body: const Center(
          child: Text('Susmita Santi'),
        ),
      ),
    );
  }
}
```

OUTPUT:

CONCLUSION: We have successfully installed Flutter and implemented the first “Hello World” using Flutter
